

Year 4 House Point Project

Our topic this half term is Anglo Saxons. We are asking children to produce a model of an Anglo Saxon village. (see an example below). This project does not have to be handed in at school until after the Easter holiday. There will be House points available for all children who complete a realistic model. This is a child led project and although they will need some support please encourage your child to complete this without a lot of direction from adults. We suggest that children start to plan their design and start to collect materials but no use of plastic is allowed. So no lego or Knex, only natural materials. We will say yes to cardboard.
